DETAILED ACTION

This is in response to amendment filed on 6/21/06 in which claims 1-30 are pending. The applicant's amendments have been fully considered therefore this case is in condition for allowance.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The prior arts of record fail to anticipate or render obvious the following recited features: obtaining an identifier for a first traffic channel defined with the first FH function; modifying a second FH function based on the first FH function and the identifier for the first traffic channel to obtain a modified second FH function, wherein the second FH function is modified such that a second traffic channel defined with the modified second FH function and the first traffic channel are orthogonal or have low correlation as recited claims 1, 13-14,, 19-20. Means for using the first traffic channel for communication with a first base station and means for receiving an assignment of a second traffic channel defined with a second FH function, wherein the first and second FH functions are orthogonal or have low correlation as recited in claim 26. Wherein the processor is farther operative to receive an assignment of a second traffic channel defined with a second FH function and provide a second FH sequence for the second traffic channel, wherein the second traffic channel is used for communication with the first base station and a second base station, and wherein the switch is further operative to determine a particular one of a plurality of frequency sub bands to use in each of a second plurality of frequency hop periods based on the second FH sequence for the second traffic channel ad recited in

claim 27. Receiving a second transmission on a second traffic channel from the first base station and a second base station, wherein the second traffic channel is defined with a second FH function, wherein a third FH function is associated with the second base station, wherein the second FH function is orthogonal to or has low correlation with both the first and third FH functions, and wherein the first FH function is pseudo-random with respect to the third FH function~ obtaining an identifier for a third traffic channel defined with the second FH function wherein the third traffic channel is associated with the first traffic channel and wherein the second FIT function is further modified based on the identifier for the third traffic channel ad recited in claims 28 and30.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
